Introduction

Blinkit, formerly known as Grofers, is an online grocery delivery service based out of Gurgaon, India. It currently operates in 500+ localities in more than 30 cities in India and offers 13000 unique products. It is a quick commerce company that promises to deliver groceries in minutes - in the blink of an eye. It currently has 400 dark stores and is looking to expand this number by 40% over the next 12 months. In 2022, Blinkit was acquired by Zomato in an all-stock deal for USD 568 million.

Growth of Blinkit

Grofers was founded in 2013 by Saurabh Kumar and Albinder Dhindsa. It was one of the early movers in the online groceries delivery space with sizeable market share. Grofers became a unicorn in June 2021 with investments Zomato and Tiger Global. After facing stiff competition from Zepto, Grofers pivoted to quick commerce in Dec 2021. Grofers rebranded to Blinkit and shut down operations in cities where they could not fulfil 10 minute deliveries. This led to cash crunch for blinkit and Zomato extended a loan of \$150 million. In June 2022, Zomato's board approved the acquisition of Blinkit in an all stock deal.

User Personas

The Planned shopper

- Urban, tech-savvy user who shops mostly via digital channels
- Has a busy schedule and prefers the convenience of online shopping
- Likes to get groceries delivered home on a weekly basis

The Spontaneous shopper

- Young, tech-savvy user who forgets to buy groceries
- Likes to makes spontaneous purchases such as chocolates and experiment with ingredients
- Has no regular schedule for grocery delivery

The Discount hunter

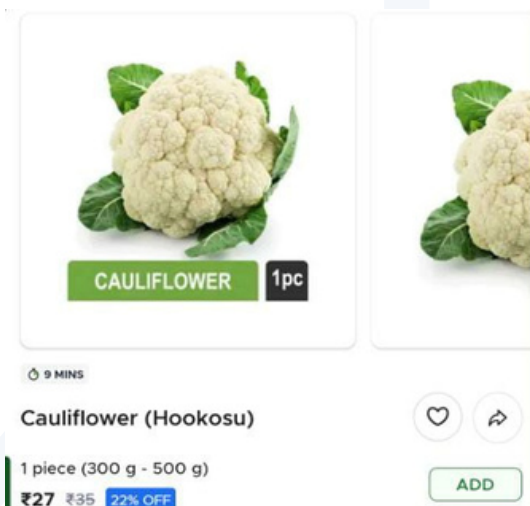

- Value oriented customer who wants the best price for purchase
- Spends time searching across platforms for the best deals and offers

Functionalities

1) Item search and listing

Interesting Features

- Blinkit makes the online grocery shopping experience better than an in-store experience by providing a comprehensive description of products, including information such as *storage tips*, *shelf life*, *offer* and *country of origin*.

Product details

Description

Cauliflower is a cruciferous vegetable that is naturally high in fiber and B-vitamins. It provides antioxidants and phytonutrients that can protect against cancer. It also contains fiber to enhance weight loss and digestion, choline that is essential for learning and memory, and many other important nutrients.

2) Brand/product discovery

Interesting Features

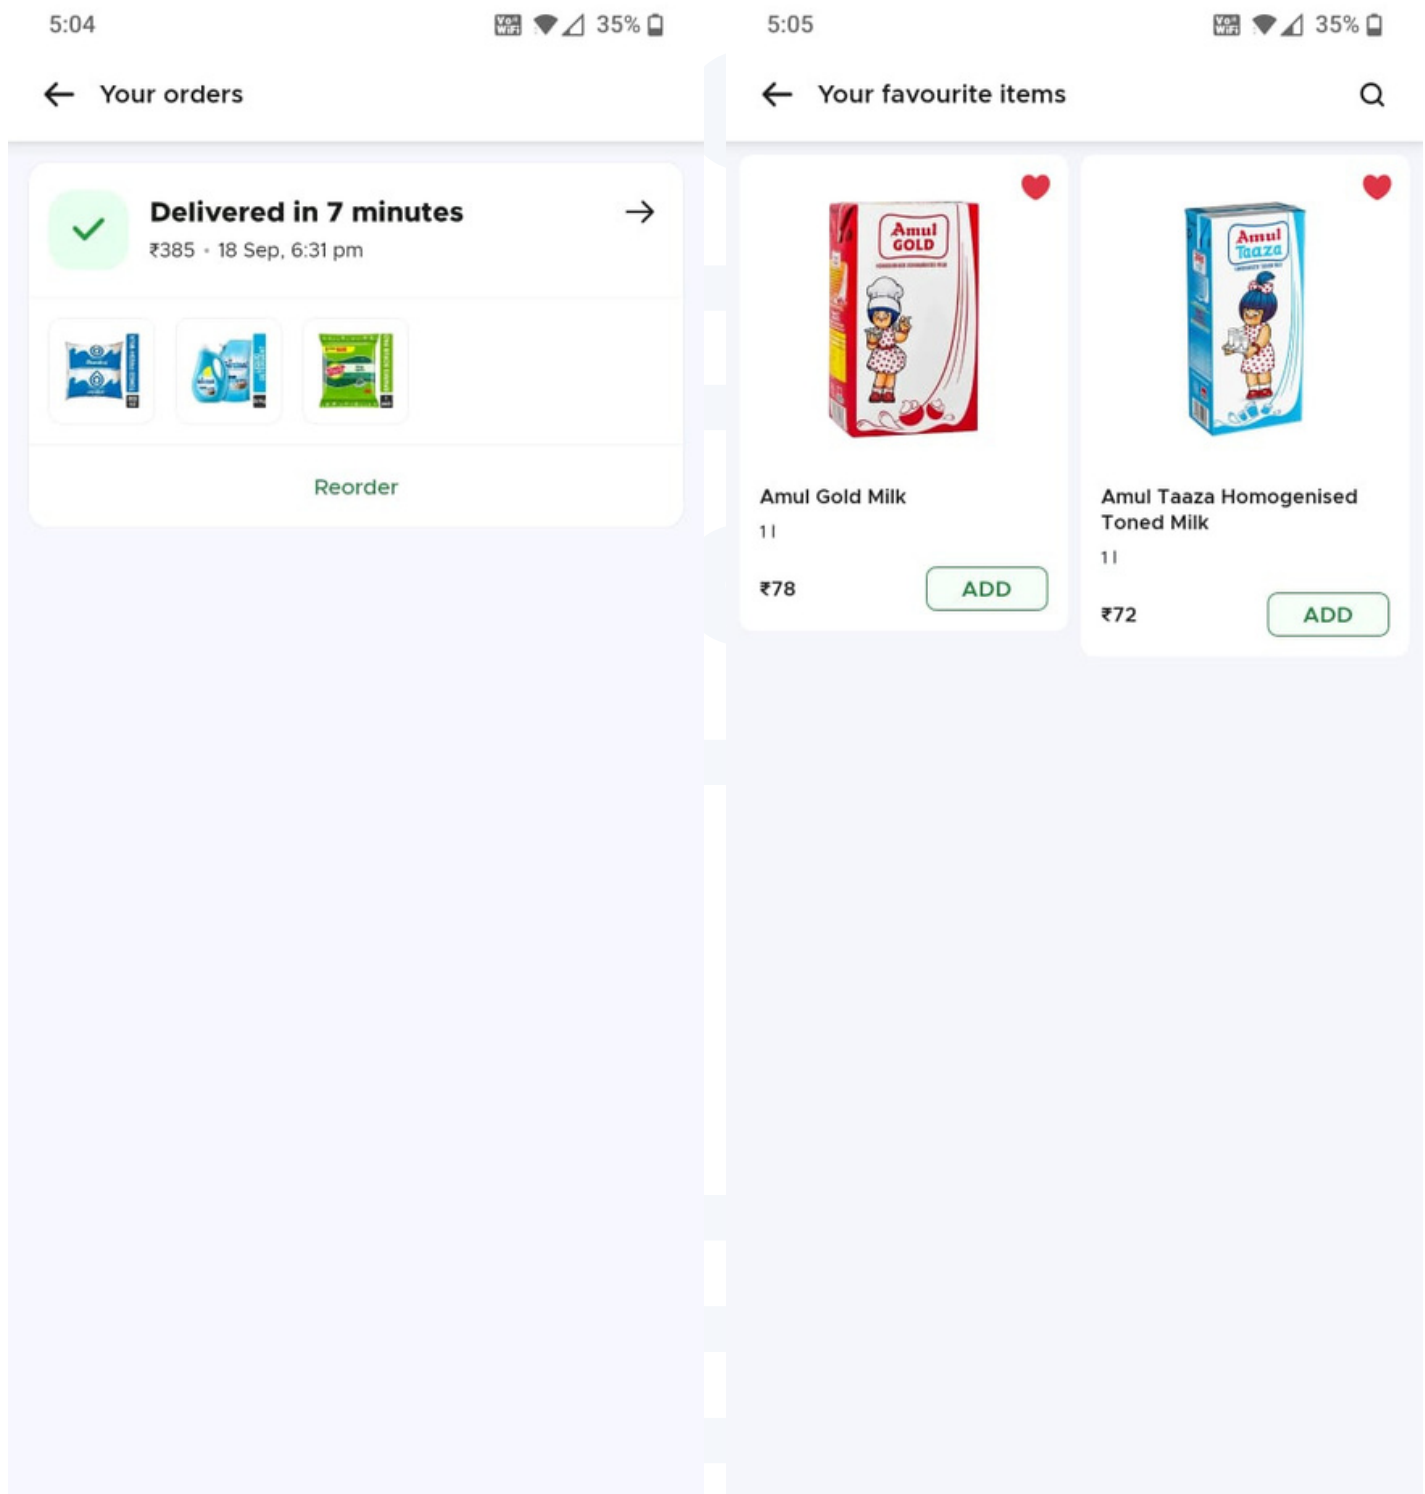

- Blinkit has launched *Brand stores* feature, which allows brands to place all their products under one page. This enables customers to discover new brands and any new products launched by their favorite brands easily. Blinkit also offers popular regional items such as Idhayam gingelly oil from Tamil Nadu.

3) Ordering and re-ordering

Interesting Features

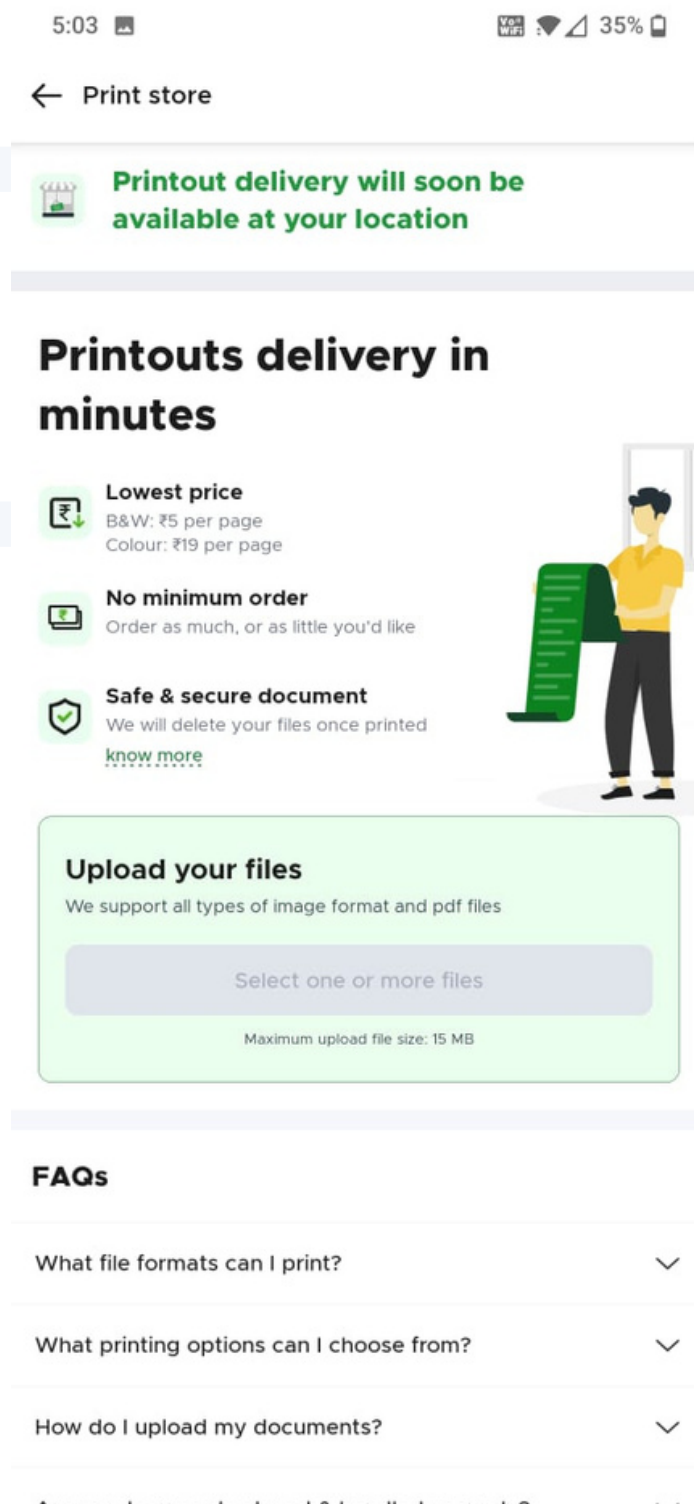

- Users can repeat their complete order from their history or add items to 'favorites' and order directly from the favorites page. This reduces search overhead and improves user experience.

4) Printouts

Interesting Features

- Blinkit has launched printout service in the Delhi-NCR region. Users can upload the document in the blinkit app and get the printouts delivered to their location.

Recommendations

- **Expiry Date:** Product description should mention the expiry for daily essentials items with short shelf life, such as bread, milk, curd etc.
- **Collaborative Shopping list:** Build a feature that allows users to create and share a shopping checklist with friends and family members.
- **Reminders to order:** Build a feature that tracks patterns in users' orders and sends a reminder prompt to order a particular item.
- **Groceries for one:** Offer a grocery basket that contains groceries required for one person for a week. Many working professionals live alone, and this enables them to purchase perishables in small amounts.
- **Ingredients for Convenience cooking:** Offer all the ingredients required to cook a dish in the right amounts in a packaged form. For example, all the ingredients required to cook a biryani for one can be sold as a 'Cook Biryani today' package.
- **Subscriptions:** Blinkit can offer subscriptions for daily essentials such as milk, water, bread etc.
- **Gifting:** Allow users to add a note with the order and share the details of the gift on WhatsApp and Instagram.

Metrics to track

North Star: Number of items delivered on time in a week

Acquisition

- Total number of new app downloads per week
- Number of new signups in a week

Activation

- % of users who signed up and searched for a product
- % of users who signed up and placed an order

Revenue

- Average order value per user
- Average number of items per order
- Total revenue generated (D/W/M)

Retention

- DAU/MAU ratio
- Number of orders created (items added to cart) /completed

Referral

- App store/play store ratings
- Net Promoter Score (NPS)
