Introduction

CRED is an Indian Unicorn with a current user base of 11.2 Million. It is a distinctive membership-based platform redefining credit card management in India. By facilitating effortless bill payments, providing rewards for punctuality, and unlocking exclusive deals, CRED transforms the way users interact with their credit cards.

Over time, CRED has grown to become a more holistic solution with added features. It now allow users to make peer-to-peer credit transactions, pay rent, make merchant payments, manage their credit score, and invest through the app.

The platform's emphasis on security ensures a protected environment for users, empowering them to make informed financial decisions while enjoying the benefits of convenience, rewards, and a thriving financial community.

The app has around 1Cr+ downloads, annual revenue of around Rs.396.6 Cr.

Competitors

User Personas

Tech Savvy Millennial

- Young adults who are early adopters of technology and prefer digital solutions.

Reward Hunter

- Individuals who are always on the lookout for the best deals, cashback, and rewards.

Casual Spender

- Individuals who use credit cards for daily expenses but aren't necessarily maximizing their card benefits and rewards.

Credit Builder

- Individuals who are new to credit or are trying to rebuild their credit score.

Functionalities

Credit Card Bill Payment

Interesting Features

- One-click solution for credit card bill payment.
- Secure payments can be made using PIN, fingerprints, and phone patterns.
- A reminder for bill payment is sent as a push notification with the pending amount.
- Provides complete information on hidden charges.

Pain Points

- In case there are no expenses on the card for the month, a notification is still sent to check if the bills are pending.

Solution

- The users should be sent a push notification about zero expenses for the month, instead of asking them to check for the bill.

Wholistic Dashboard

Interesting Features

- One-stop monitor for all your credit needs.
- Allows you to monitor your credit card, rewards earned, and spent on lifestyle within the app.
- Alert users of any hidden charges in their credit card statements.

Pain Points

- CRED scan score is not shown on the dashboard which might be important for the users to track rewards/payment.

Solution

- The users should be able to see their spends/payments through CRED to reward ratio this will instigate a habit of timely payments.

Know Your Credit Score

Interesting Features

- Easy access to credit score.
- Categorise credit score as healthy or unhealthy through color coding.
- Easy to detect a reduction in credit score.
- Also provides access to Experian and CRIF scores.

Pain Points

There is no means to generate a statement to report disputes

Solution

- Allowing users to generate a credit report within the app and using the same to report a credit issue.

Feature Snapshot

- **Cred RentPay-** Helps users pay their rent. Offers in-app discounts.
- **Cred Cash-** Provides loans to the cred community with a 15.5% extra fee.
- **Cred Mint-** Allows users to invest money and offers an interest of 9%.
- **Cred Store-** It is a premium brand-based marketplace.
- **Cred Protect-** Allows users to understand their spending patterns and credit card statements.

Metrics to Track

North Star: Number of Transactions per month

L1 Metrics: Recurring transactions peruse.

L2 Metrics: Average transaction value.

Active Users: This metric measures the number of users who actively engage with the CRED app within a specific time frame, such as daily and monthly active.

User Retention: User retention measures the percentage of users who continue to use the CRED app over a specific period

Conversion Rate: The conversion rate measures the percentage of users who take a desired action within the app, such as making credit card bill payments or engaging with partner offers.
