Introduction

A leading healthcare company Cult.Fit (previously Cure.Fit) is a preventive and curative healthcare and fitness company offering services for mental and physical well-being. Cult.Fit delivers physical and mental wellbeing across 6 flagship verticals:

1. **Cult.Fit** - A chain of group workout fitness centres & gyms
2. **Eat.fit** - A cloud Kitchen delivering healthy meals
3. **Mind.fit** - A chain of mental fitness centres
4. **Care.Fit** - A chain of health centres with pharmacies
5. **Whole.Fit** - A marketplace for clean label grocery products
6. **Cult Sports** - A online store to sell fitness equipments

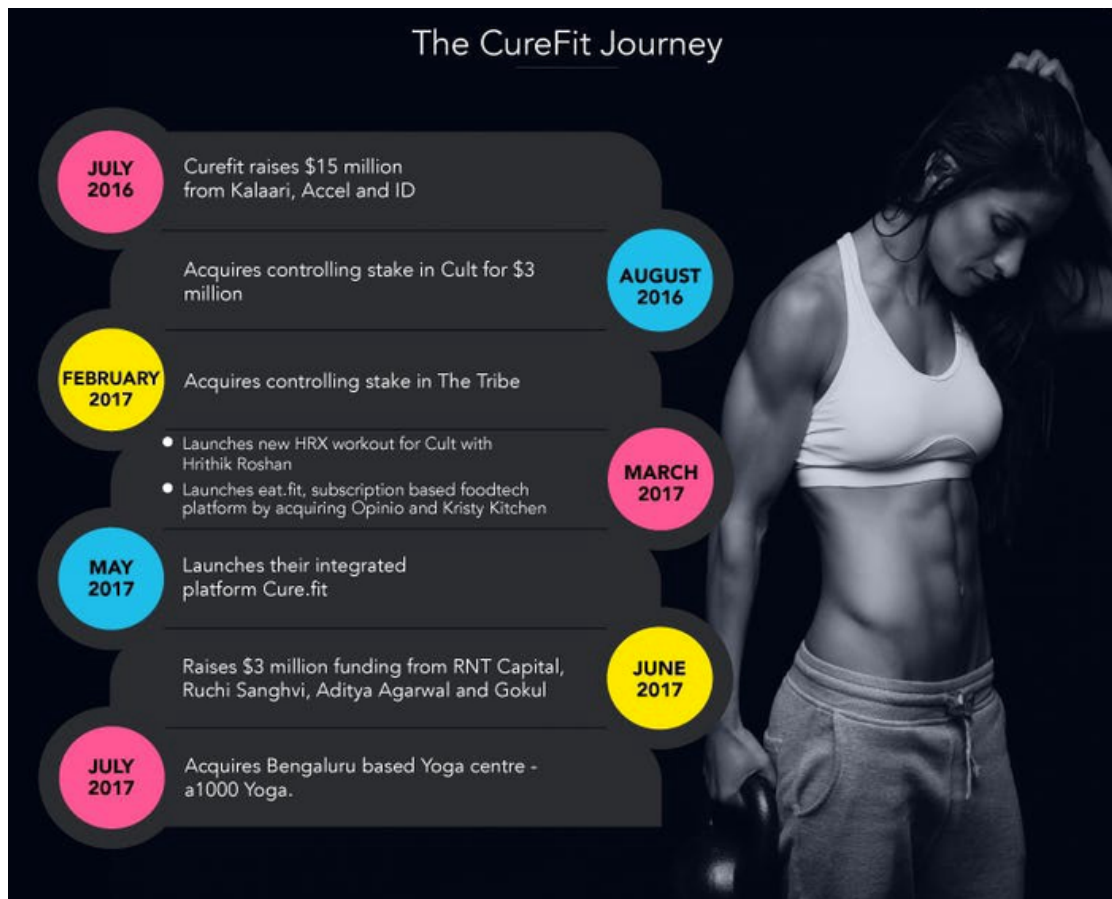

Cult.Fit aims to make fitness fun and easy. Cult.Fit gives workouts a whole new meaning with a range of trainer-led, group workout classes. Founded by Nagori and Mukesh Bansal in 2016, the company has 270 Cult.fit centres across 18 Indian cities until 2020

User Personas

Novice User

- **Characteristics** : Occasional Exerciser, Inexperienced
- **Goals** : Takes small steps to lose or maintain weight and stay fit
- **Pain Points** : Dislikes exercise, Needs reminders to eat healthier, Can't keep track of progress

Health User

- **Characteristics** : Health issues, compelled to be fit
- **Goals** : Control diet and habits to solve health issues. Build awareness of the effects of daily habits
- **Pain Points** : Difficulty keeping all metrics and data in one platform, Obtaining vital information to provide to doctor

Fitness Enthusiast

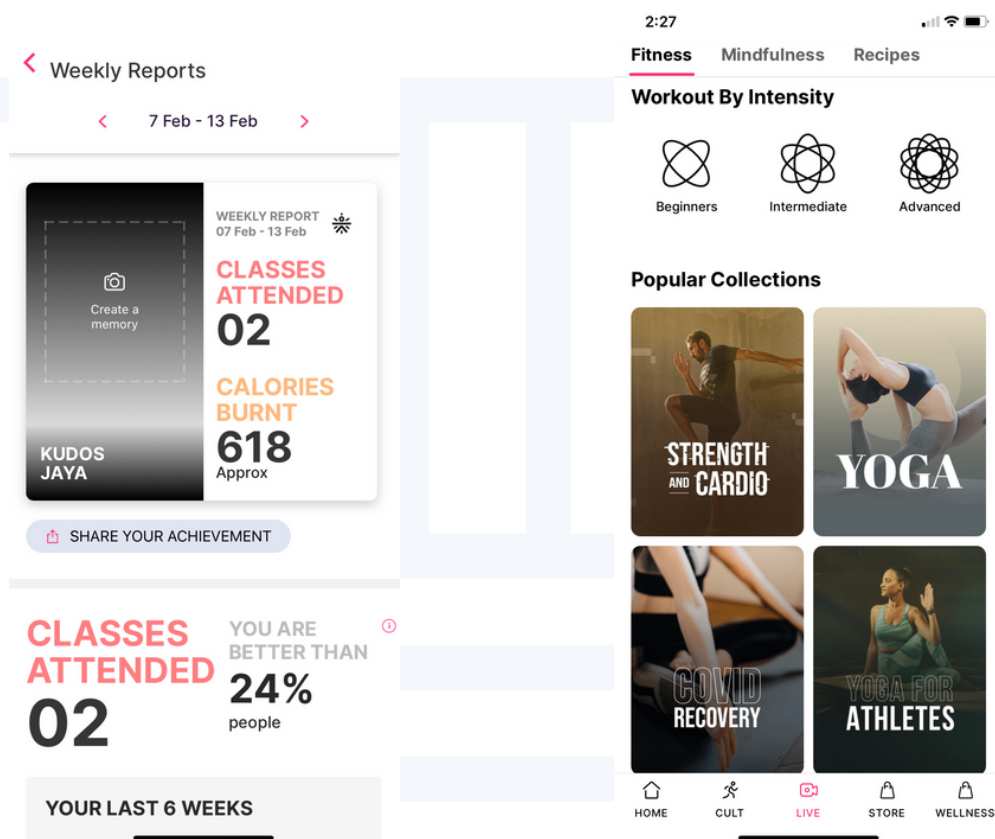

- **Characteristics** : Frequent Gym goer, Tech Savvy
- **Goals** : Improve workout quality and intensity over time for professional training
- **Pain Points** : Trouble fitting work-out times between busy schedules, Unsure if they are making actual gains

Functionalities - Analysis

1)Cure.fit

Interesting Features

- *Energy Meter* - Live tracking of hand and leg movements to check co-ordination with the trainer and his/her steps. Based on the similarity score, a score and rank is given to each user that is indicative of their energy levels during the workout
- *Fitness Journey* -Summary of the number of classes attended per workout style and the calories burnt in the process. It also shows the duration of workout and visualizes monthly progress in a graphical format
- *Trending Sessions and Collections* - Based on the most popular workout formats, this feature helps users choose the most trending ones. Also, collections based on type of workout and intensity have been segregated for enabling easy decision-making

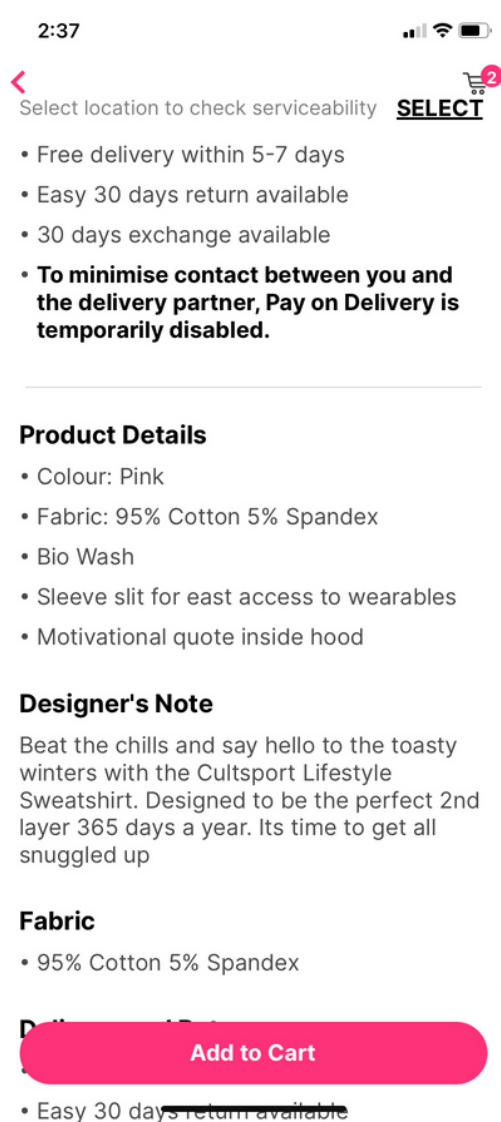

Pain Points

- Energy meter points difficult to track on the screen during workout and user cannot infer anything in real time during workout about his/her energy levels
- Fitness journey gives information across classes, it does not show any useful inference during the journey in a workout and is challenging to improve upon the vague metrics
- Huge collection of workout makes it difficult to choose the most appropriate one and sometimes when user doesn't know where to start, such huge amount of information can be overwhelming

2) Cult.fit store

Interesting Features

- *Designer's Note* - The product details page contains trivia about the product which gives a unique selling point to each product in a more readable format
- *Shop by Workout* - Products have been categorised by workout type which makes it easier for users, especially amateurs to find the right sports gear and accessories. The app also shows collections that are trending or adhere to a specific style
- *Deal of the Day and Bestsellers* - It shows the most attractive offer for a particular day with an easy Buy Now button that saves the hassle of searching on the app

Pain points

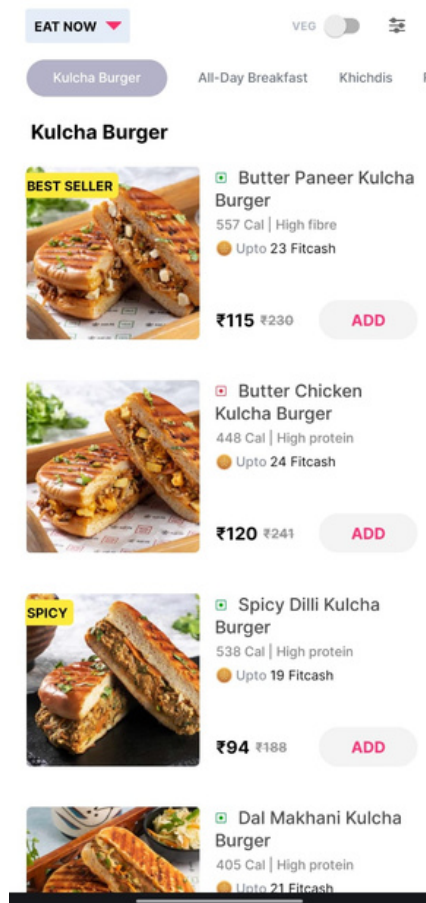

- User is unable to judge how the product actually feels and looks in reality since he/she cannot know what experience other previous buyers have had
- Designer's Note can seem vague especially given that views about clothing can be very subjective and it has no credibility in it
- Limited options in Deal of the Day offers, also it is less often updated giving only few choices to consumers
- Limited amount of filters available per product category which increases scrolling time for user

3) Eat.fit

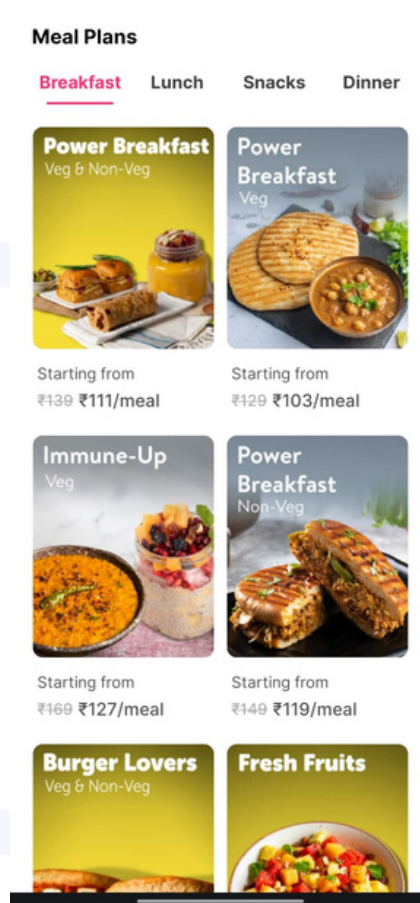

Interesting Features

- *Individual Order* - Let's you browse through the wide variety of food/diet available showing their calories and ingredients, with option to order online for immediate consumption or schedule for meal of the day
- *Meal Plan* - Offers a weekly curated common menu on subscription basis and delivers at the planned meal time
- *Dietician* - Consultation with dietician and preparing a curated personalized menu based on lifestyle and diet requirement

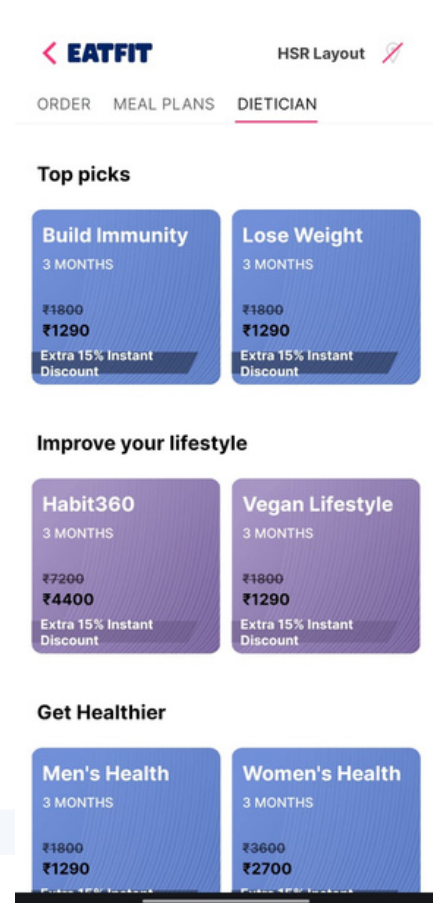

Order

Meal Plan

Dietician

Pain Points

- Immediate delivery of food, doesn't provide estimated delivery time till payment. Hence customer won't order for immediate consumption when hungry without knowing delivery time
- No option to search from menu, hence finding a known item from menu becomes complex as one has to scroll and find
- Food Category displayed on top is difficult to navigate when scrolling, having a category pop-up at bottom right corner will enable easy navigation
- Meal plans are fixed, one can't curate their own meal plan and place an order for a week entirely. Enabling flexible meal plan will enable more customers to choose their own meal

4) Wellness

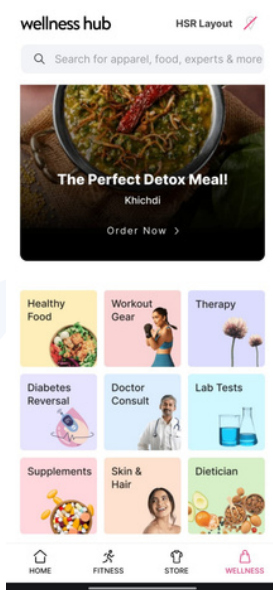

Interesting Features

- *Doctor Consult* - Online consultation with a wide variety of doctors ranging from COVID care, general physician to pulmonologist with their experience, availability and fees
- *Therapy* - Therapy sessions for various mental health issues like anxiety, sleep, stress, depression etc.
- *Lab Tests* - Fulfilled by at-home health test provider *Healthians* and enabling a wide range of health checkups at the convenience of home
- *Whole.fit Supplements* - A division enabling purchase of health supplements for dietary needs including protein, snacks, staples etc.
- *Recipes* - A wide variety of healthy home cooked recipes for easy cooking with health details and step by step procedure

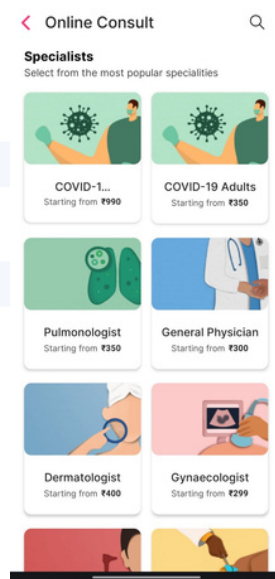

Pain Points

- Lack of review or feedback mechanism for Doctors. Lab reports and supplements provides less credibility on the services/product provided
- Most of the time the recipes option is used when we want to cook something immediately. Lack of option to choose a recipe from available ingredients makes it tedious to find the right recipe

Solutions

- **Cure.fit**

- Energy meter scores can be announced using motivational statements during the workout so that users can act upon it
- Recommendations for upcoming workouts based on the fitness journey of the user. This will enable users to try out newer workouts and gain useful insights from fitness journey feature
- Introduce expert.fit which is an AI Chatbot which helps users navigate throughout the app and choose the most appropriate workout without having to search much for it

- **Cult.fit store**

- Add Reviews section for users to post photos and write product reviews
- Sub-categorize sports wear and accessories into workout intensity to accelerate user's purchase decision
- Add new filters like fabric, fit, body type, price range in the product page. Add sorting functionality based on price, popularity, relevance, etc

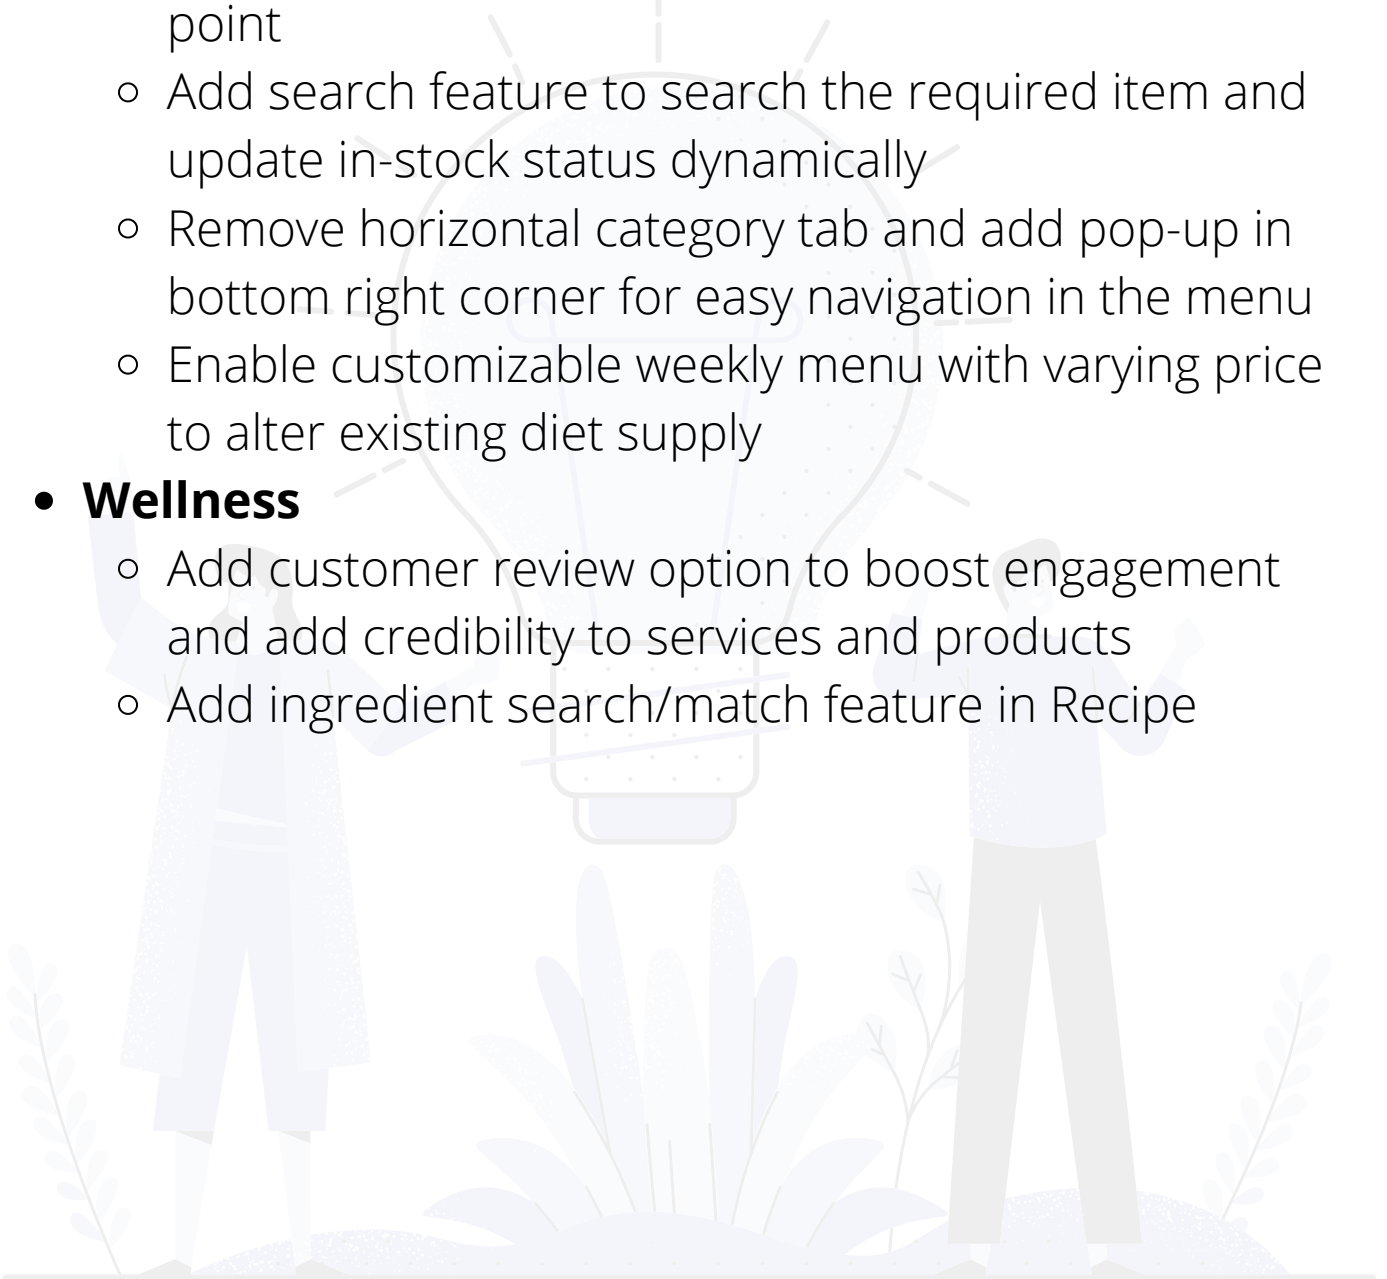

Solutions

- **eat.fit:**

- Add estimated delivery time feature based on cooking time, proximity of the kitchen and delivery point
- Add search feature to search the required item and update in-stock status dynamically
- Remove horizontal category tab and add pop-up in bottom right corner for easy navigation in the menu
- Enable customizable weekly menu with varying price to alter existing diet supply

- **Wellness**

- Add customer review option to boost engagement and add credibility to services and products
- Add ingredient search/match feature in Recipe

Metrics to track

Number of Daily Active Users (DAUs)

Acquisition

- Total number of new app downloads per week.
- Rate of people in the middle of sign-up process per week

Activation

- % of users who have completed the registration process to new app downloads in a week
- Number of users buying offline and online Cult Subscription

Revenue

- Revenue earned from Cult Subscription monthly
- Average revenue earned per user per week from fit.store and eat.fit

Retention

- Number of Daily Active Users/Monthly Active Users
- User churn rate - users who are not repurchasing Cult Subscription for 6 months ÷ users who purchased Cult Subscription at the beginning of the 6 month period

Referral

- % of total users who signed up via invite links per week
- Total invite links shared externally per week
