Introduction

Groww aims to simplify complex financial products in India, especially for first-time and young investors. The Groww app allows users to invest in fixed deposits, stocks, gold, mutual funds and develop a savings portfolio.:

The company is currently looking to foray into the neobanking space with a new neobanking platform that it will likely launch soon. According to one of the sources close to Groww, the company believes that being a neo-banking company will further make it holistic for the users, which want to emerge as a one-stop solution for banking and investment.

Competitors

Journey of Groww

Groww was co-founded by **Lalit Keshre, Harsh Jain, Neeraj Singh and Ishan Bansal** in May 2017

Name & game

Has raised **\$141.8 million** from backers such as Tiger Global, Sequoia Capital, Ribbit Capital, YC Continuity and Propel Venture Partners

Claims to have **over 1.5 crore registered users across 900+ cities**

Users under-30 constitute two-third of the investor base; GenZ (18-24 years) make up 30%, while millennials (25-30 years) constitute 35%

40% of users are from metros; rest come from tier II and beyond

In May, Groww acquires **Indiabulls Asset Management Company**

Online investment platform

started with mutual funds, and now offers a wide range of investment options such as **stocks, IPOs, ETF, Gold, NFO, US equities** etc

Among top direct mutual fund distribution platforms; Claims to be opening **over 2.5 lakh new SIPs every month**

Has opened more than **20 lakh demat accounts** since last June

Congratulations Dear Investor!

You can start investing in stocks now

LET'S START!

User Journey for existing user

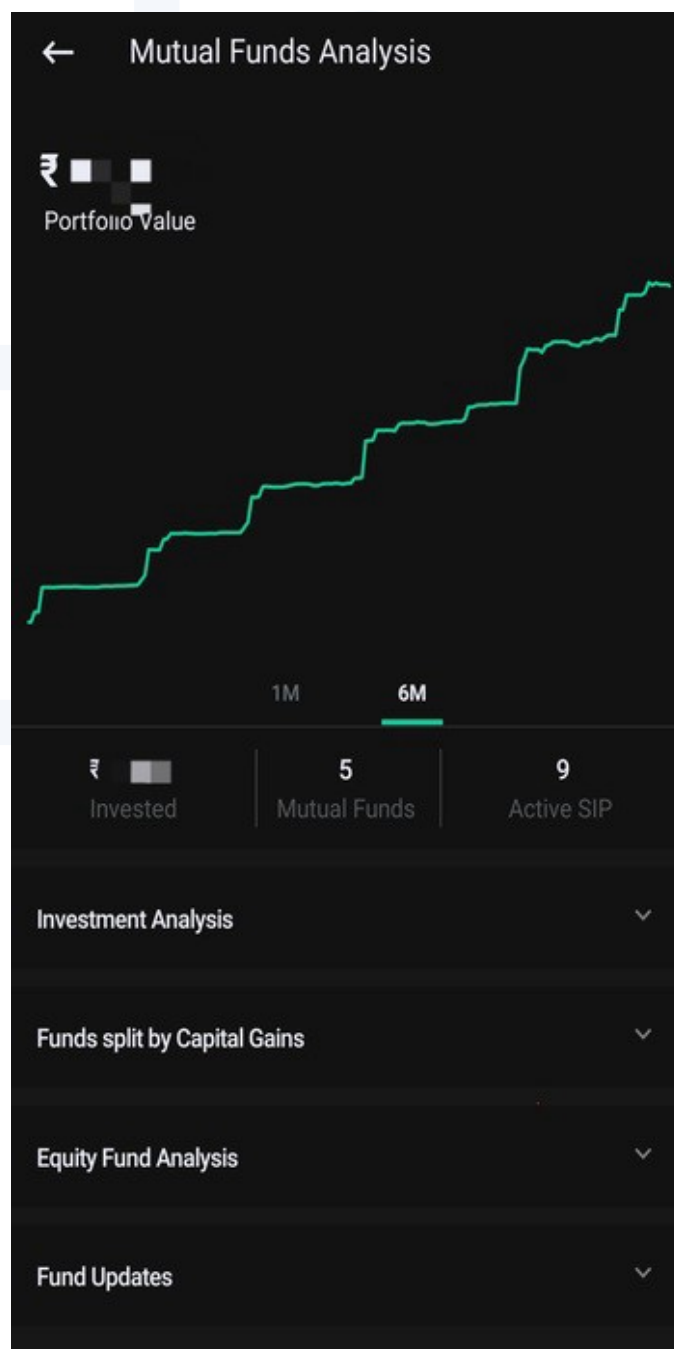

Functionalities - Analysis

1) Mutual Funds Portfolio Analysis

Interesting Features

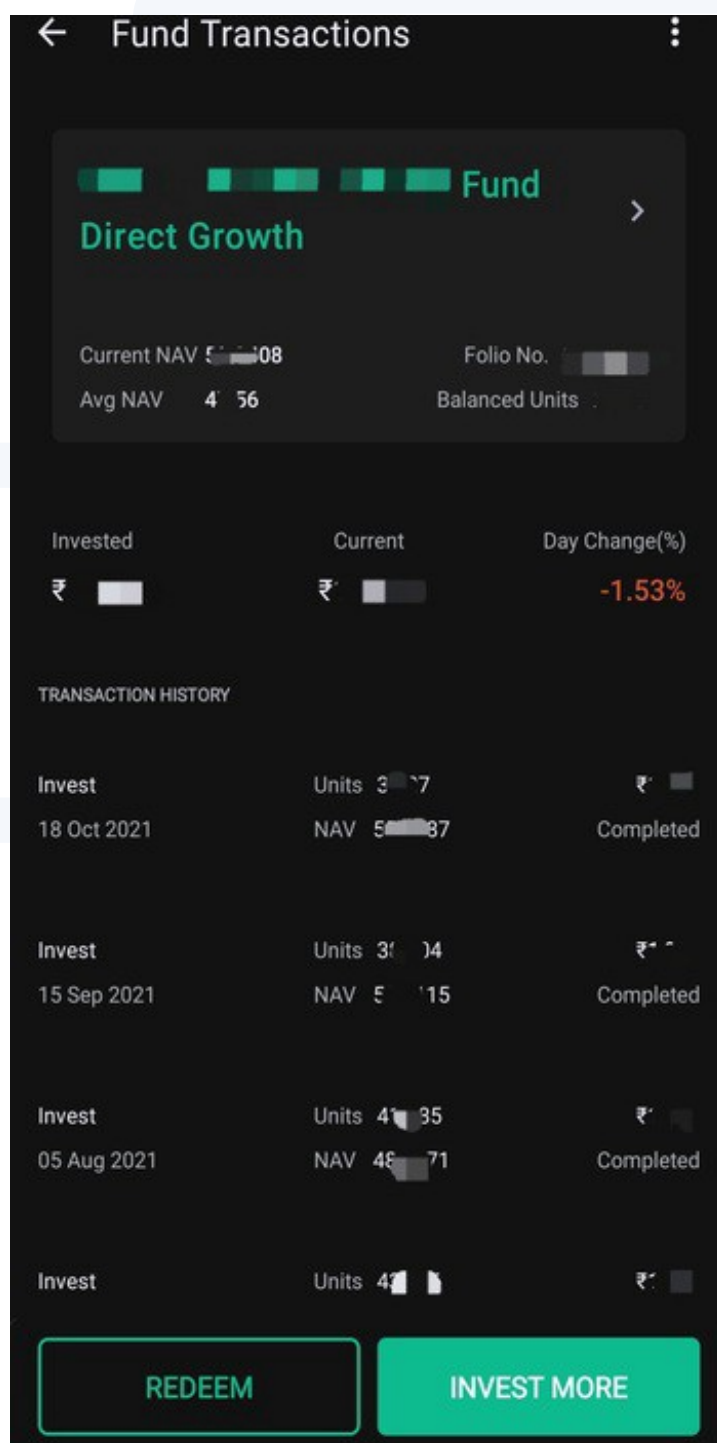

- Portfolio analysis on Groww is super user-friendly and compact. Visual representations of investment analysis, category-split, and company-split provide investor with the tools to remain in control of their investments.

2) Fund Transactions

Interesting Features

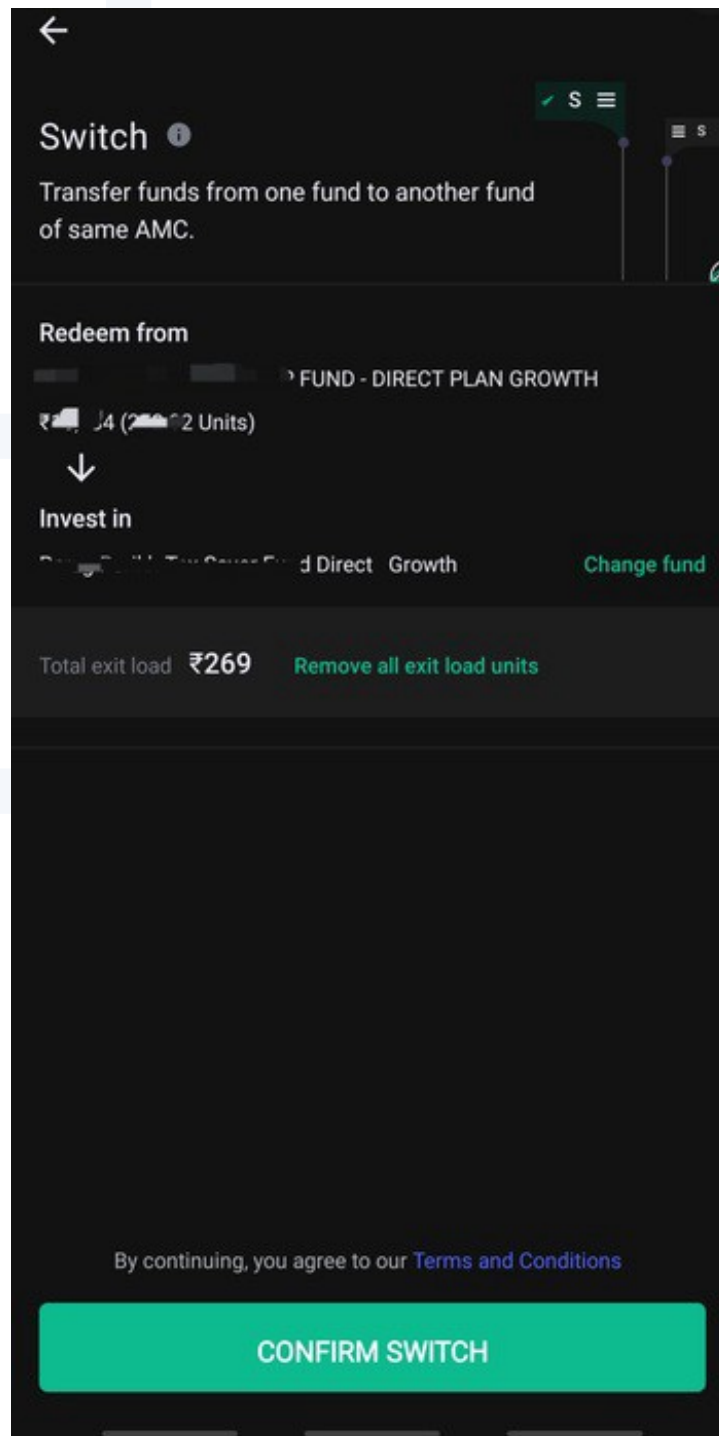

- This feature delivers transparency in form of a neatly compiled audit trail which is an easy stop for the investor interested in transactions and NAV history.

3) Switch

Interesting Features

Groww's fund switch. The switch enables the investor to shift from one fund to another which is managed by the same Asset Management Company. Right now, the user has to redeem all the assets while switching which can also attract exit loads.

The screenshot shows the 'Switch' interface in the Groww app. At the top, there's a back arrow and a 'Switch' title with an information icon. Below the title, a subtitle reads: 'Transfer funds from one fund to another fund of same AMC.' The interface is divided into two main sections: 'Redeem from' and 'Invest in'. The 'Redeem from' section shows a fund name 'FUND - DIRECT PLAN GROWTH' and a value of '₹4 (2.02 Units)'. A downward arrow indicates the transfer direction. The 'Invest in' section shows a fund name 'FUND - DIRECT PLAN GROWTH' and a 'Change fund' button. Below these sections, the 'Total exit load' is displayed as '₹269' with a 'Remove all exit load units' button. At the bottom, there's a disclaimer: 'By continuing, you agree to our [Terms and Conditions](#)' and a large green 'CONFIRM SWITCH' button.

Switch ⓘ

Transfer funds from one fund to another fund of same AMC.

Redeem from

Invest in

FUND - DIRECT PLAN GROWTH Direct Growth [Change fund](#)

Total exit load ₹269 [Remove all exit load units](#)

By continuing, you agree to our [Terms and Conditions](#)

CONFIRM SWITCH

Recommendations

- **Charts analysis sharing** – Build a feature to share the chart analysis done on single or multiple instruments with other Kite users within the app and feature to download it as an image/pdf which can be shared via other mediums
- **Forum for traders** – Build a forum for traders to discuss strategies, experiences, opinions, grievances, and connect with like-minded people. This can be made free to use for Kite users
- **Debt Easy finder** - Allow you to search debt using any or all combinations of name, maturity date, and coupon code instead of the ISN code. This will list all the debt available in a convenient manner on basis of the user filter
- **Watchlist Filter** - Allows you to filter the stocks in the watchlist on basis of other parameters such as market cap - small, mid, and large-capitalization and/or sector composition - tech, FMCG, pharma, etc
- **Stock Tagging** - Allows you to add a custom tag on stocks which can be used for quick filtering and identification of special stocks at multiple places
- **Planned Announcements**- News concerning the company's internal announcements like bonuses, dividends, split, rights issues, etc should be marked on the stock chart to explain planned sudden price movements of shares and correlate them on the chart

Recommendations

- **Virtual Investment Leader board:** Users get Virtual Money on a Monthly Basis to trade on a simulation-based platform that follows real-time market movement, this helps them build confidence in their learning from Groww App and Groww Pro. A Leader board would highlight the top performers over the month in Equity, Futures and Options, and Commodities.
- **Crypto Learning and Simulation:** As per Analysts it's very difficult for Indian brokers like Groww and Zerodha to get into Crypto Trading as those are completely unregulated markets. Groww can launch its own Crypto Learning and Simulation Feature. If done so, it has the potential to attract young Gen Z Investors who are finding the right guidance to learn Crypto. This would be a Paid Add-On Web Feature.

Metrics to track

North Star: Number of Daily Active Users (DAUs)

Acquisition

- Total number of new app downloads per week.
- Rate of people in the middle of sign-up process per week

Activation

- % of users who have completed the registration process to new app downloads in a week
- Average amount of funds per user transferred in the wallet

Revenue

- Revenue earned from brokerage per day per trading category
- Average brokerage earned per user per week

Retention

- Number of Daily Active Users/Monthly Active Users
- User churn rate - $\frac{\text{users who are not trading for 6 months}}{\text{users present at the beginning of the 6 month period}}$

Referral

- % of total users who signed up via invite links per week
- Total invite links shared externally per week
