Introduction

Instagram is a photo and video sharing social networking platform owned by Meta which can be used both on mobile applications and web browsers.

Originally launched for iOS in October 2010, it rapidly gained popularity, with one million registered users in two months, 10 million in a year, and 1 billion as of June 2018.

It offers various functionalities such as chat function, video calls, stories, reels and much more.

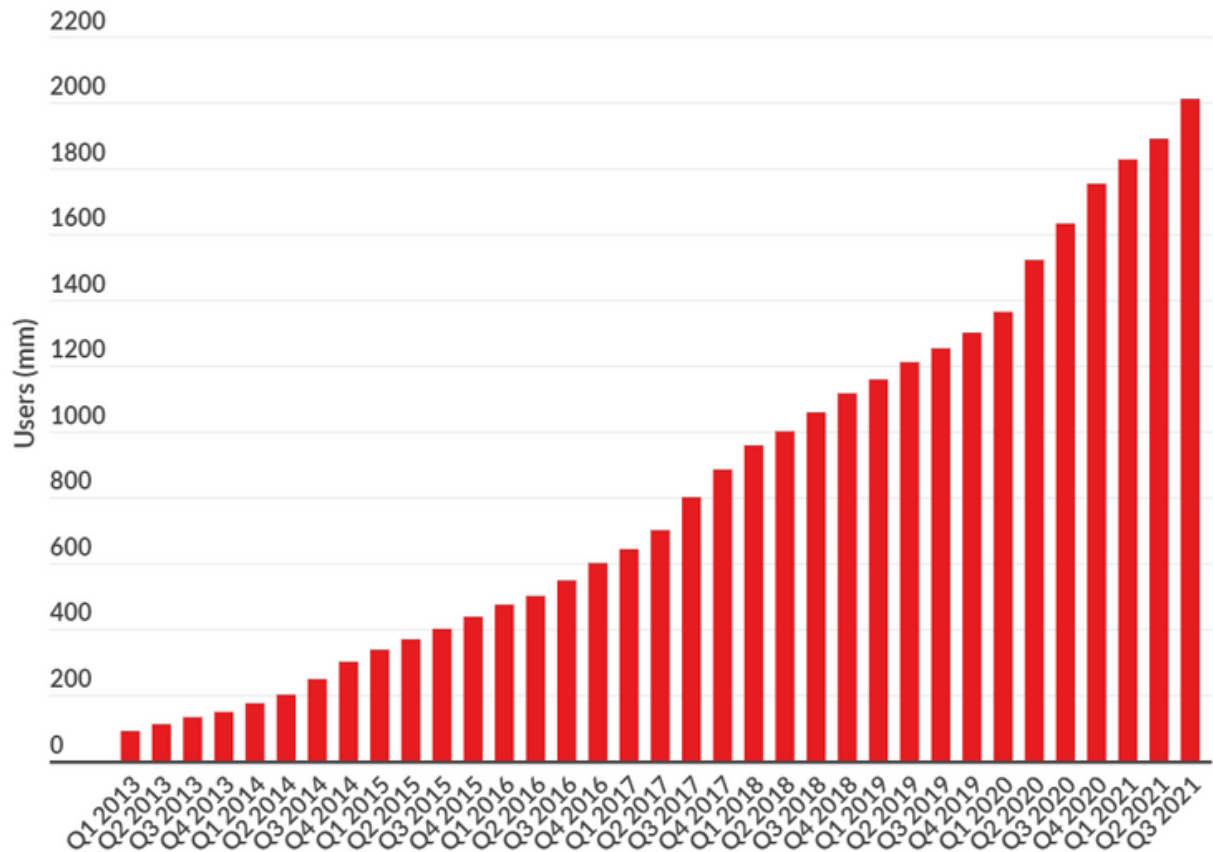

Instagram is ranked as the 4th most popular social network by number of users.

User Personas

Personal Use

- People aged 18-24 make up the largest portion

Professional Use

- Brands/Businesses
- Artists
- Celebrities
- Meme Pages
- Influencers
- Content Creators, etc.

Functionalities - Analysis

1) Reels

Interesting Features

- Filters/Effects - Users can use fun filters while creating Reels
- Increase/Decrease speed (0.5x, 3x etc.) - Users can adjust the speed of a particular clip of their Reel
- Self-Timer - Users can shoot alone using Self-Timer & Hands-Free options

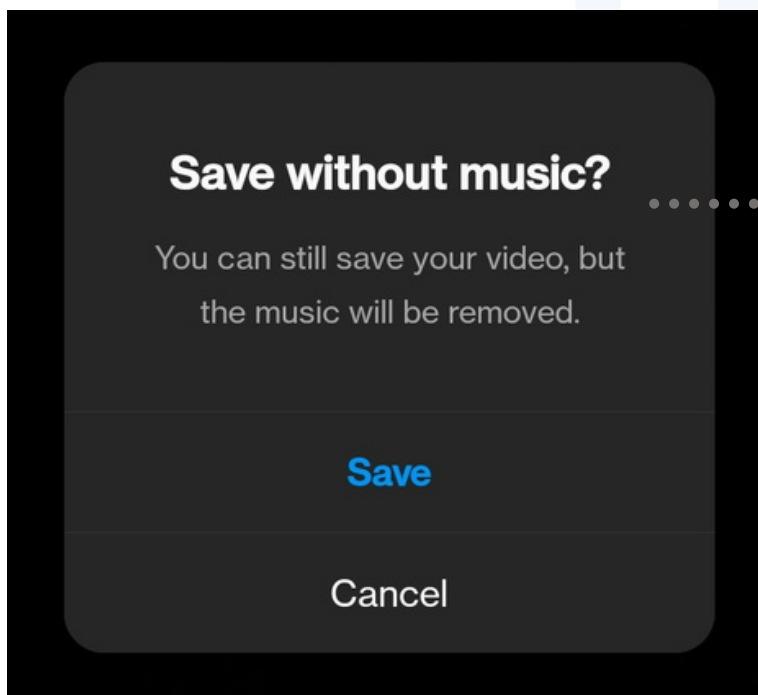

Features - Audio,
Speed, Duration,
Layout,
Self-Timer

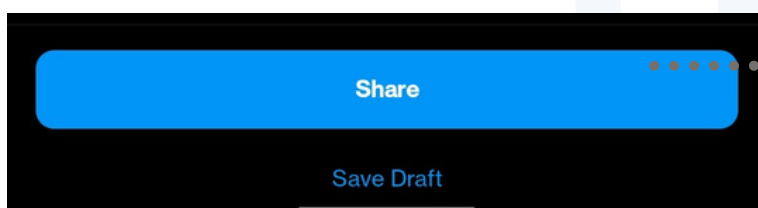

Features -
Filters/Effects

Pain Points

- Cannot share self-created Reel as a DM - Users can only share it to the feed or save as drafts. No option of sharing it to specific people
- Cannot save a Reel to a collection - Posts can be saved to collection by doing a Long-Press on the save button. Nothing of that sort is available for Reels
- Rearranging clips while creating Reels is not possible - Users have to start from the scratch if clips are in wrong order
- Cannot save to gallery with music - Reel is saved to gallery but without any audio

.....➔ Saving Reel to Gallery
- No Music

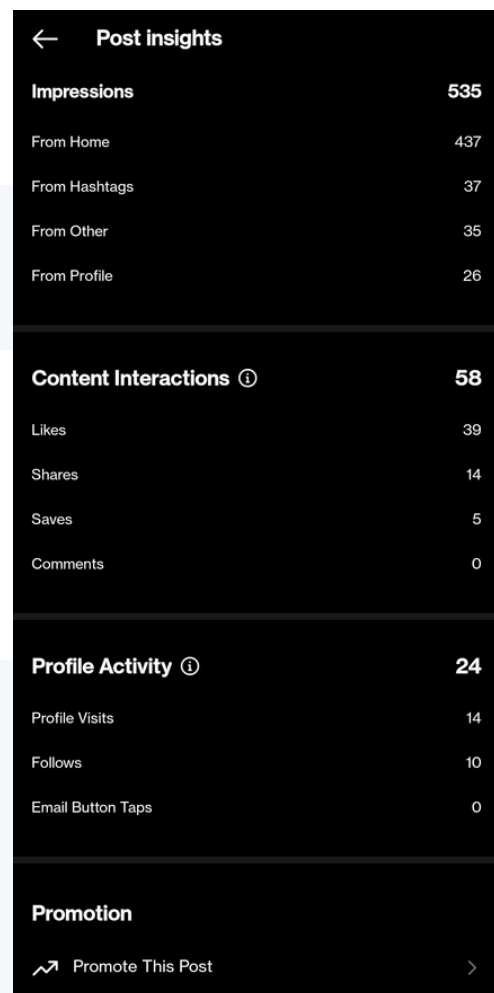

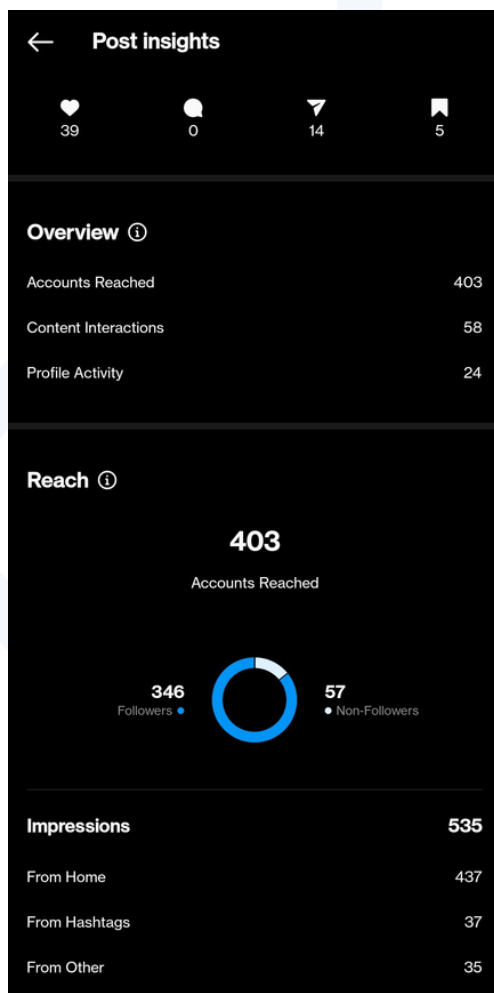

Pressing 'Share' here
.....➔ directly uploads to
the feed. DM isn't
possible.

2) Business Account Features

Interesting Features

- Insights about reach - Lot of insights as shown in the images
- Boost Reach - Promotions of posts can be done through this
- Saved Replies for common questions - Saves a lot of time and effort of sending same message to many people

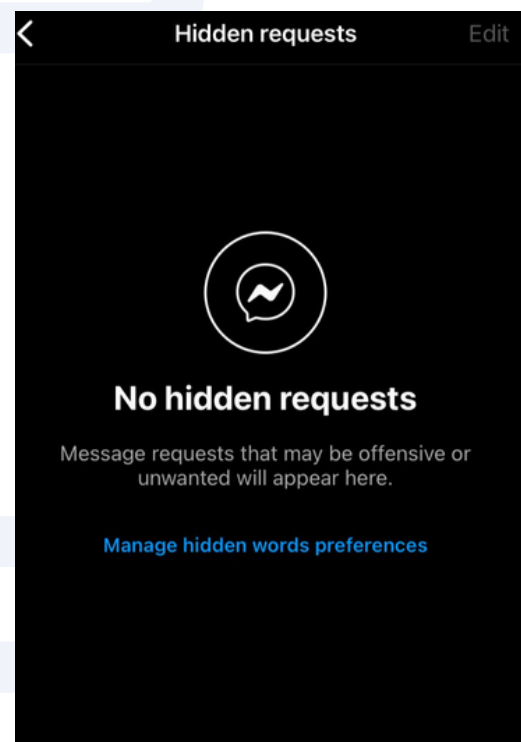

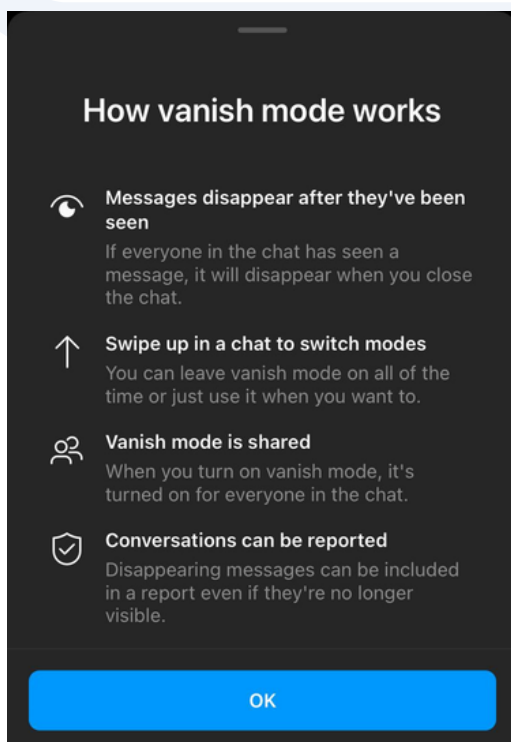

Pain Points

- Confusion about which hashtags to use
- Content based insights along with post based
- No review option available for products
- Search and explore similar to regular accounts

3) Messaging and Calls

Interesting Features

- Watch Together - When on a video call with their loved ones or colleagues, users can watch their favorite posts, reels, or accounts together
- Vanish Mode – This protects user's privacy when they want to talk about something confidential, automatically erasing the chat after the mode is turned off
- Hidden Requests - Requests of messages from suspicious accounts are automatically sent here, letting users stay untroubled by mysterious activities
- Accept/Decline Message Requests - Gives users the option of accepting or declining message request from unknown accounts without letting the other person know about the read status

Pain Points

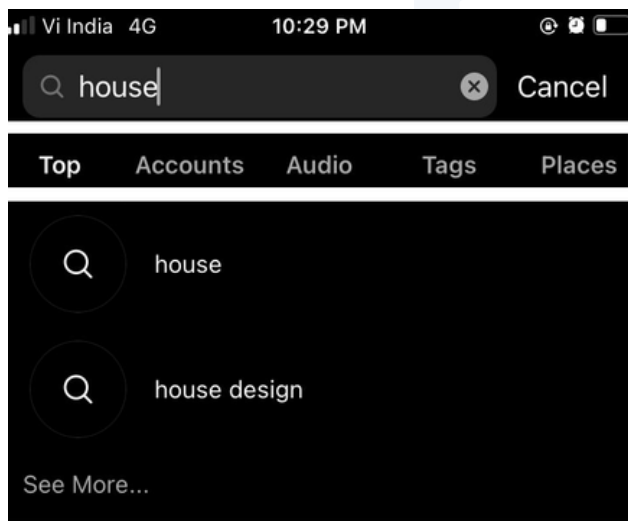

- Search Chat - Long-lost chats or important messages cannot be found by just typing the search keywords
- Mark Messages – Users cannot mark or highlight important messages and threads in the chat
- Media Categorization – Shared posts, reels, documents, images, etc. are not available in categorized manner in chat
- Swipe Reply for Reels – Reply to reels is possible only through long press; swiping for quick reply is not available
- Sticker Sharing – Users cannot share their favorite stickers or sticker packs with one another

4) Search and Explore

Interesting Features

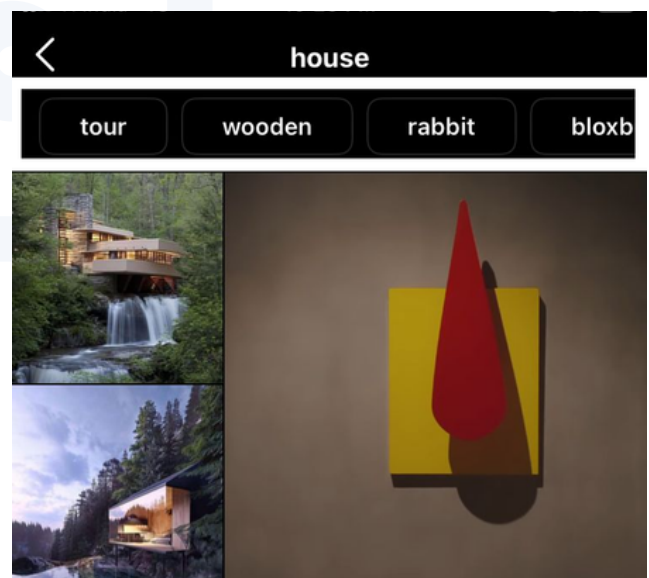

- Search by Category – Search option is not only to find accounts but also enables users to find relevant audios, tags and places
- Suggestive search – Different keywords such as doodle art, healthy recipes, backyard camping, etc. are suggested in a loop, enabling users to explore interesting content

- Follow Content – You can follow not just people or businesses but also relevant hobbies, activities or just things by following the respective hashtags
- Extended Search – On searching about random things such as house, tabs with relevant categories such as tour, wooden, rabbit, design, etc are available to make searching easier

Search by Category
- users can find relevant audios, places and much more

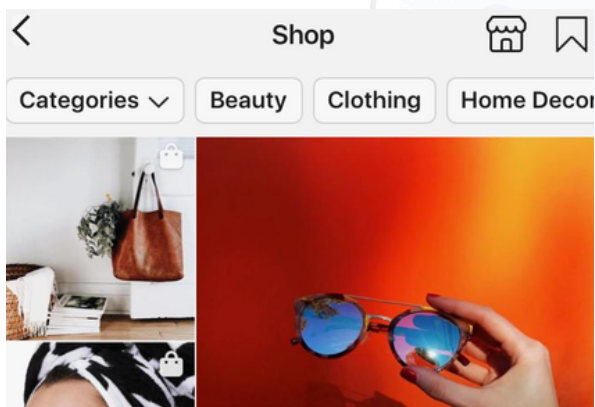

Extended Search - offers users categories or suffixes for keyword

Pain Points

- Products to Purchase – No option is available to exclusively search for the products sold by different business accounts on Instagram

- Explore by Category – In previous versions of Instagram, the explore page had categories such as health, beauty, shop, IGTV, etc. enabling users to access only relevant content which now is all cluttered together
- Irrelevant Content – Often, paid and promoted content along with advertisements which might be irrelevant to users is shown on the explore page of the users

Previous versions of Instagram providing separate Shop option on Explore page

Solutions

- **Reels Sharing** – Enable the option to send the reel as DM to an individual or in a group chat and then further allowing the same reel to be shared from the chat on the profile. This way, it will get easier to get it a review before an individual posts it
- **Chat Window** - Add a search feature to search for specific messages in the chat. Add a section of stickers to send along with a sticker customization feature for users to create their own stickers. Allow swipe reply for reels sent/received in DMs

- **Reels Collection** - While reels collection can be made and managed from the saved folder, there is lack of an option of saving it to a collection directly while saving the reel itself
- **Media Manager** - Categorize the media sent in chats into different sections like reels, pictures/videos, audio messages, etc. which will save time and efforts of user
- **Search Products** - Build a feature for the Instagram shop that allows users to search for specific products on Instagram and allow businesses' added hashtags/description to be searched. Hashtags and description will help narrow down the search for the user and promote trending products as well
- **Hashtag Suggestions** - Suggest hashtags to businesses intelligently by identifying the colors/objects in the image of their product and also suggest hashtags based on trends
- **Reviews** - Enable reviews for products listed by different businesses. This will organize reviews that are currently posted by buyers as comments as they will be able to review the product directly on the product's page
- **Product Catalogue** - Build a product catalogue by using the information provided by the businesses with smart categorization and trends comprised in the home page along with search/suggestions of products based on user preferences like the explore page
- **Star messages** - Develop a feature to allow users to mark/highlight specific messages that they wish to save and come back to later easily

- **Smart Promoter** – Use AI/ML to assist users/businesses by suggesting them influencers or pages that they can do a paid promotion of their products with. They can search for accounts to partner using filters like influencer reach, budget, location, etc.

Metrics to track

North star metric - Number of Daily Active Users (DAUs)

Acquisition

- Total number of new users signing up on instagram per week
- Conversion rate from landing on app store/play store to app download for new users

Activation

- Total number of new users spending 15 minutes or more on the app per week
- Avg. time taken for new users to complete their profile

Revenue

- Total revenue earned from ads impressions per week
- Total revenue earned from ads clicks per week
- Conversion rate from total impressions to total number of purchases via Instagram shopping

Retention

- Number of Daily Active Users/Monthly Active Users
- User churn rate - users who left in a month ÷ users at the beginning of the particular month

Referral

- % of total users who signed up via invite links per week
- Total Instagram invite links shared externally per week
